

What do the US military, Ford Motor Company, Auto-body shops nationwide and numerous fine artists have in common?

- They all value a highly controllable atomized spray, known to them as Preval.
- They know that Preval will consistently deliver for them.
- Preval is the spray gun of choice for professionals.
- Its a good value with good values. (Made in the USA and 100% recyclable)

Preval can give your company the ability for your product to be used with a high touch application, using technology that is surprisingly affordable. This is *Industrial design at its best*. Preval is an inexpensive, consumer friendly and multi-faceted spray delivery system. Preval can atomize just about any liquid. Preval is the catalyst for the successful use of your product. Your product will be applied with a technology that will delight the customer. It's F.A.S.T. (Fill, Attach, Spray - Today!). Our spray technology will complete your product line. "If you don't have it today, you should!"

## How Does Preval Work? The Patented PREVAL Design

Preval has a proprietary technology that makes a highly controlled atomized spray from any liquid. When the button is pressed, propellant and liquid are mixed and dispensed as a spray at the nozzle by action of the venturi effect. Liquid from the jar is pulled up the tube as propellant travels across the holes in the red insert (inside the button). The propellant and liquid do not mix prior to being dispensed out of the nozzle.

What Preval can do for your product line...

**Auto, marine and aerospace touch-up.**

**Tanning and personal beauty spray.**

**Furniture and fabric finish (stains, lacquer, varnish etc.).**

**Restoration applications (fossils, painting, adhesive, etc).**

**Industrial disinfectants, cleaners and sanitizers (2 components).**

**Marine touch-up (gel coat).**

## Thinning

**Note:** The following Thinning Guide represents specific instructions for paints and thicker materials. The Preval Sprayer is not limited to only spraying these products. Visit [www.preval.com](http://www.preval.com) for more information on the many different uses of your Preval Sprayer.

Thinning Guide		
Product	Ratio	
	Product	Thinner
Varnish	4 fl oz (118 mL)	0.5 fl oz (15 mL)
Enamel	4 fl oz (118 mL)	1 fl oz (30 mL)
Lacquer	4 fl oz (118 mL)	1 fl oz (30 mL)
Latex Paint	3 fl oz (89 mL)	2 fl oz (59 mL)
Oil & Alkyd Base Paints	4 fl oz (118 mL)	1 fl oz (30 mL)
See manufacturer's instructions for automotive paint.		

Stains, shellac or other water-thin products generally do not require any thinning. Use the thinner recommended by the manufacturer whenever thinning.

**NOTE:** For water-based paints and acrylics - thin at a 3:2 ratio. Remove container from power unit, add conditioner and shake before re-attaching to power unit.

## Paint Coverage

**NOTE:** The following results will vary. This table is for reference only. Follow the instructions and estimated coverage on the manufacture's label.

PREVAL Estimated Paint Coverage				
Type of Paint Used in the Preval System	Dilution	Thinner Used	Coverage (Sq. Ft.)	Volume Used (ml)
Red Lacquer (Oil Based)	4 to 1	Lacquer Thinner	85.5*	440
White Latex (Water Based)	3 to 2	Latex X-Tender®	60.0*	125
Clear Varnish (Oil Based)	4 to 1	Paint Thinner	153.9*	340
White Alkyd (Oil Based)	4 to 1	Mineral Spirits	102.6*	160
Brown Protective Enamel (Oil Based)	4 to 1	Mineral Spirits	102.6*	230
White Semi Gloss Medium Base Latex (Water Based)	3 to 2	Latex X-Tender®	85.5*	185
* Estimated values from evacuation testing of one Preval power unit per type of paint

## **Ford Windstar Recall**

Ford is recalling about 425,000 of its 1999-2003 Windstar minivans because a front-subframe rust problem could cause steering problems. Who is Ford teaming with to make this recall a success? Preval. Ford is mandating in the recall, that dealers purchase a Preval sprayer to apply the coating. With Preval's reputation for professional spray quality, this was an easy choice for Ford.

Tool requirements from Ford:

A Preval Spray Gun is required to apply PM-13-AAnti-Corrosion Coating. One spray gun cartridge will either complete four axle reinforcement repairs or complete 15 rear axle cleaning and inspections. Obtain from local hardware stores, home centers, etc. Research indicates spray gun is available at most Sherwin-Williams stores and some Home Depot stores. Reimbursement for spray gun is included in both Rear Axle Cleaning and Inspection and Axle Reinforcement Repair allowance. See Attachment I, Claims Preparation and Submission section.

### **Testimonials...**

*Dan Adams, Parts Manager of Hopkins Ford Lincoln Mercury in Jenkintown, Pennsylvania raves about how well the "Preval sprayer applies Ford Motorcraft's anti-corrosion coating for their Windstar recall, which allows the anti-corrosion coating to dry properly." (as opposed to using a brush) Adams continues, "its easy to use, and works great." When Ford wanted to get it right, Preval wasn't just a recommendation. It was a printed mandate.*

*Dan Adams: "I learned about Preval when Ford sent us the instructions for servicing the Windstar recall."*

Prepackaged Kits

Remove brush.

Remove insert.

Place bottle in Preval container.

Insert power unit pickup tube in bottle of touch-up paint.

Package a touch-up paint bottle(s) with Preval and paint like a professional. This package will give the customer an easy and affordable way to touch up their automobile. With Preval's technology, the spray quality will be superior to that of a brush. This is a great way to promote your product to the do-it-yourselfers.

**Testimonials...**

*"I have to say, I was sure this was not going to work, but was I wrong. I put my touch-up bottle down in the jar just like you said and it was just like having a spray can. Glad I tried it. I'm ordering another one today for my dad."*

*"Wanted to let you know folks can use this in the shop to. I used it to paint a dresser for my wife. Works real good."*

**DuraCoat® Firearm Finishes**

**Testimonials...**

*“The quality finish is absolutely beautiful.”*

*“This is a good marriage of products for the gun enthusiasts, a quality coating and readily available supplies to apply it.”*

*“This is how I apply DuraCoat®, works great and my local hardware store has the Preval units.”*

*“... pretty neat concept.”*

*“This stuff is just awesome...”*

The DuraCoat® System is the very latest in firearm finishing technology. This kit allows you to apply DuraCoat® like an aerosol; no need for an airbrush or other spray equipment. Now you can refinish your firearm easily with the exclusive Prep ‘N Spray system.

Only Preval’s technology will give you results like this. No need for expensive airbrushes or spraying equipment that require air and/or electricity. Preval does all of this in one convenient, user friendly package.

## SOLORCOLOR™ Spray Tan

SOLORCOLOR™ is an innovative, safe, and all-natural spray tan that will revolutionize your perception of tanning.

SOLORCOLOR™ is very user-friendly and returns professional results without the extra cost to you. This is patented technology designed to give you a gorgeous, natural tan. There is no other product like this in the tanning industry.

SOLORCOLOR™ is a convenient portable product – easy to put together, dismantle, and take on the go! Our product is great for at-home touch-ups, along with full-body applications.

SOLORCOLOR™ can help you go green and the cost per unit is very reasonable compared to other spray tanning products in the industry. Not only do we deliver better results, we also deliver a better product at a lower price.

SOLORCOLOR™ uses the private label method to promote their product.

### Testimonials...

*“...apply anywhere, any time.”*

*“Using Preval is so easy...”*

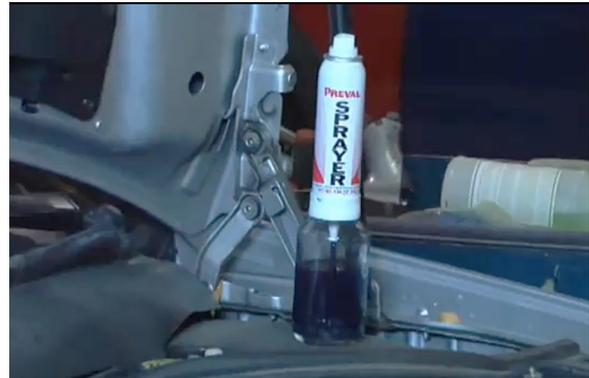

*“...it is portable, you can use it anywhere...”*

*“...you can do it yourself.”*

*“I am definitely using it again.”*

**Auto Body Industry**

Gold Coast Auto Body uses Preval for quick touch-ups and for jobs that only Preval can do. Preval is used along side of equipment that cost thousands of dollars more. Easy clean up and the ability to reach tight spaces are only a couple of reasons Preval can work for you.

**Testimonials...**

*"I like to use Preval because I can get into areas that brushes or actual paint guns won't allow me to."*

*"...perfect for things you do not want to over spray."*

*"I love using Preval because it's fast and easy."*

*"You'll save money with it."*

*"A simple hinge paint job takes me 10 minutes, versus having to take it to the paint shop for three hours."*

*"...those Preval sprayers work really good! Especially for auto paint and clear coat."*
