

### Multi-Use Paint Brush

The VersaBrush combines five painting tools into one. It serves as a can opener, hammer and brush holder and also features an interchangeable head design and extendable pole threads. The brush holder keeps the wet brush over the can of paint, while interchangeable brush heads allow users to swap out used brush heads.

### Sprayer Attachment

The Preval Sprayer is an aerosol-based system that allows users to use paint as sprayable material. The sprayer attaches to the included reservoir, which users can fill with the desired paint. It works with most water-, solvent- and oil-based paints as well as latex paints.
